CERTIFICATION BULLETIN 2010-06

Change from type L to type R service (NBSXC, UOJZC, UOXXC and UTOUC)

To: Applicants of Control Units, System, Fire Alarm; Control Unit Accessories, System, Fire Alarm; and Household Fire Warning System Units

This bulletin is intended to provide information regarding the transition of the above-mentioned CCN's (product categories) from a Type L service to a Type R service. This transition will provide consistency within the ULC & UL Marks and not affect cost or the inspection frequency associated with the current structure for inspections. This transition will also provide shorter lead time when ordering new labels, and allow for the ability to print within the UL authorized manufacturing location.

As of the issuance of this bulletin, upon approval of label artwork, and upon receipt of an updated Follow Up Service Procedure (FUSP) customers will be eligible to apply Type R labels to their product. If a customer so chooses, they may continue to use any remaining Type L labels in their inventory until either the label stock is exhausted, or, the 3-year life cycle of the label is reached.

As part of the transition, the FUSP will be updated at no cost and will include:

1. The updated Authorization page and
NOTE: It is suggested that the Manufacturer retain the current Authorization page until such time as they begin using the new labels. Once started, the old Authorization page may be destroyed.
2. A control number will be assigned and a new listing mark data page will be issued., Please work with your local field representative or the Label Centre to design the new art work.

If a Customer desires to use the new label as soon as possible, please contact Customer Service at customerservice.ca@ca.ul.com or at 866-937-3852. Any questions regarding the use of these labels can be directed to your local UL Label Center.

For the above noted categories, orders for the old Type L labels will no longer be processed by the UL Label Center.

This bulletin is effective immediately.

Sincerely,

UNDERWRITERS LABORATORIES OF CANADA
