STANDARDS BULLETIN 2008-13

Second Edition CAN/ULC-61318-08

LIVE WORKING – CONFORMITY ASSESSMENT APPLICABLE TO TOOLS, DEVICES AND EQUIPMENT

ULC is pleased to announce the publication of CAN/ULC-61318-08 (CEI/IEC 61318:2007, IDT), Second Edition of Live Working – Conformity Assessment Applicable to Tools, Devices and Equipment. This Standard has been approved by the ULC Committee on Live Working, and has been published under the date of October 2008.

This is an identical adoption, without any technical changes, of the International Electrotechnical Commission CEI/IEC 61318:2007.

This National Standard of Canada provides elements for product conformity assessment and defines assessment methods for products having completed the production phase to assure that they conform to the requirements of the corresponding product standard for Live Working. It is to be used in conjunction with live working corresponding product standards.

The following are not covered by this Standard, but are included in each product standard: type tests; provisions and description for sampling and routine tests; and the identification and classification of the corresponding defects resulting from a risk analysis.

If you require any additional information, please contact Keith Jansa at 613-755-2729 ext. 6227 or by email at: Keith.Jansa@ca.ul.com

This standard can be ordered for \$132.00 CAN (Hardcopy) from the ULC website (www.ulc.ca) ULC online store.

Yours truly,

UNDERWRITERS LABORATORIES OF CANADA
