STANDARDS BULLETIN 2009-17

Second Edition of CAN/ULC-61229-09

RIGID PROTECTIVE COVERS FOR LIVE WORKING ON A.C. INSTALLATIONS

ULC is pleased to announce the publication of the Second Edition, CAN/ULC-61229-09 (CEI/IEC 61229:2002, MOD), Rigid Protective Covers for Live Working on a.c. Installations. This Standard has been approved by the ULC Committee on Live Working, and has been published under the date of March 2009.

This is an adoption, with Canadian Deviations, of the International Electrotechnical Commission Standard CEI/IEC 61229:2002.

This National Standard of Canada is applicable to protective covers used to cover live, dead, or adjacent earthed (grounded) parts in order to prevent contact with any electrical conductors, apparatus or circuits.

The use under d.c. conditions is not covered by this Standard.

A protective cover is only used to provide protection when a worker inadvertently comes into momentary contact with the protective cover, and the selection of the protective cover is based on the system operating voltage.

If you require any additional information, please contact Keith Jansa at 613-755-2729 ext. 6227 or by email at: Keith.Jansa@ca.ul.com

This standard can be ordered for \$258.00 CAN (Hardcopy) from the ULC website (www.ulc.ca) ULC online store.

Yours truly,

UNDERWRITERS LABORATORIES OF CANADA
