## STANDARDS BULLETIN 2010-15

### Third Edition CAN/ULC-S104-10

#### STANDARD METHOD FOR FIRE TESTS OF DOOR ASSEMBLIES

ULC Standards is pleased to announce the publication of the Third Edition CAN/ULC-S104-10, Standard Method for Fire Tests of Door Assemblies. This Standard has been approved by the ULC Standards Committee on Fire Tests and has been published under the date of July 2010.

This fire test method is applicable to door assemblies (comprising doors, frame products, hardware, glazing materials, and other parts, accessories or components) of various materials and types of construction, for use in wall openings to retard the passage of fire.

This test method is also applicable for evaluating individual components (doors, frame products, hardware, glazing materials, light kits, louvers and other parts or accessories) intended as part of a fire test assembly.

Wood core doors meeting the requirements of CAN/ULC-S113, Standard Specification for Wood Core Doors Meeting the Performance Required by CAN/ULC-S104 for Twenty Minute Fire Rated Closure Assemblies, and frames meeting the requirements of CAN/ULC-S105, Standard Specification for Fire Door Frames Meeting the Performance required by CAN/ULC-S104, are not required to be tested to the requirements of this Standard. However, doors and frames meeting these specifications may be used for the evaluation of individual components.

It is the intent that tests made in conformity with this test method will develop data to enable regulatory bodies to determine the suitability of door assemblies for use in locations where fire protection of a specified duration is required.

If you require any additional information, please contact Mary Huras at (613) 755-2729 ext.6215 or by email at [Mary.Huras@ca.ul.com](mailto:Mary.Huras@ca.ul.com).

This Standard can be ordered for \$193.20 CAN (Hardcopy) from the ULC website at [www.ulc.ca](http://www.ulc.ca) by clicking on ULC Standards followed by Sale of ULC Standards Materials and selecting ULC Online Store.

Yours truly,

ULC STANDARDS
