## STANDARDS BULLETIN 2011-23

### First Edition CAN/ULC-S667-11

#### METALLIC UNDERGROUND PIPING FOR FLAMMABLE AND COMBUSTIBLE LIQUIDS

ULC Standards is pleased to announce the publication of the First Edition CAN/ULC-S667-11, Metallic Underground Piping for Flammable and Combustible Liquids. This National Standard of Canada was developed by the ULC Standards Working Group on S667 and was formally approved by the ULC Standards Committee on Fittings for Flammable and Combustible Liquids.

This Standard sets forth the minimum requirements for metallic and composite primary carrier, secondary containment, normal vent and vapour recovery and integral primary/secondary pipe systems (pipe and fittings) intended for underground use in distribution and venting applications of petroleum-based flammable liquids and combustible liquids, alcohols, and alcohol-blended fuels as identified in this Standard.

For the purpose of this Standard, flammable liquids and combustible liquids mean gasoline, fuel oil, kerosene and diesel fuel, including gasoline with small amounts of additives such as detergents, solvents for detergents and anti-icing chemicals; diesel with up to 5% biodiesel and gasoline with up to 15% ethanol or methyl tertiary butyl ether (MTBE).

CAN/ULC-S667-11 is available for purchase at \$ 154.00 for soft copy or \$ 184.82 for hard copy from the ULC website ([www.ulc.ca](http://www.ulc.ca)) ULC online store. Should you require any additional information, please contact Tess Espejo at (416) 757-5250 ext. 61212 or at email address: [Theresa.Espejo@ca.ul.com](mailto:Theresa.Espejo@ca.ul.com).

Yours truly,

ULC STANDARDS
