## STANDARDS BULLETIN 2013-13

---

**First Edition of CAN/ULC-S675.1-14**  
**Standard for Leak Detection Devices (Volumetric Type) for Flammable Liquids and Combustible Liquids**

---

ULC Standards is pleased to announce the development of the First Edition of CAN/ULC-S675.1, Standard for Leak Detection Devices (Volumetric Type) for Flammable Liquids and Combustible Liquids.

The requirements in this Standard provide the minimum performance criteria for equipment for the detection of leakage from storage tanks for flammable liquids and combustible liquids by directly or indirectly measuring the presence of liquid over a period of time.

The requirements provide for the determination of the capability of equipment for the measurement of actual or potential leakage rates within defined statistical probabilities.

The requirements do not apply to non-volumetric leak detection equipment or methods.

CAN/ULC-S675.1-14 will be based on and replace ULC/ORD-C58.12 Leak Detection Devices (Volumetric Type) for Underground Flammable Liquid Storage Tanks.

As a standards development organization (SDO) recognized in Canada as having the competence to develop National Standards of Canada, ULC Standards is among the SDOs whose standards development work is eligible for funding from the Standards Council of Canada (SCC). SCC funding is specifically slotted for the review and update of various technical standards maintained by SCC-accredited SDOs that are referenced in Canadian federal regulations and which have been confirmed by government departments as being of ongoing significance to their regulatory mandates.

If you require any additional information, please contact John Wade at 613-755-2729 ext. 61426 or by email at: [John.Wade@ul.com](mailto:John.Wade@ul.com).

Yours truly,

ULC Standards
