First Edition CAN/ULC-S670-14

STANDARD FOR ABOVEGROUND NONMETALLIC TANKS FOR FUEL OIL AND OTHER COMBUSTIBLE LIQUIDS

ULC Standards is pleased to announce the publication of the First Edition CAN/ULC-S670-14, Standard for Aboveground Nonmetallic Tanks for Fuel Oil and Other Combustible Liquids.

This National Standard of Canada is based on, and now supersedes ULC/ORD-C80.1-12, Nonmetallic Tanks for Oil-Burner Fuels and Other Combustible Liquids. It was approved by the ULC Committee on Stationary Nonmetallic Storage Containers for Flammable and Combustible Liquids, and is published under the date of September 2014.

This Standard covers minimum requirements for nonmetallic tanks of the atmospheric storage type from 227 to 2500 L intended primarily for the storage and supply of heating fuel for oil burning equipment, or alternately, for the storage of diesel fuels for compression ignition engines and motor oils (new and used oil) for automotive service stations, in aboveground applications.

Each tank type is permitted to be fabricated in a combination of various tank shapes (cylindrical, rectangular or obround) and tank orientations (horizontal, vertical) and may have integral options (tank supports or accessories) as covered in this Standard. These shop-built tanks are completely fabricated, inspected and tested before shipment from the factory as completely assembled vessels.

This standard can be purchased for \$328.00 (hardcopy) or \$274.00 (PDF format) through our website at www.ulc.ca and by selecting the link to *ULC Standards*. Once on the ULC Standards homepage, select *Sales of ULC Standards Materials* for further details.

Should you require additional information, please contact Tess Espejo at (416) 288.2212 or by email at address: Theresa.Espejo@ul.com

Yours truly,

ULC Standards
