STANDARDS BULLETIN 2014-38

Third Edition CAN/ULC-S528-14

STANDARD FOR MANUAL STATION FOR FIRE ALARM SYSTEMS, INCLUDING ACCESSORIES

ULC is pleased to announce the publication of the Third Edition of CAN/ULC-S528-14, Standard for Manual Stations for Fire Alarm Systems, Including Accessories. This National Standard of Canada was developed and approved by the ULC Committee on Fire Alarm and Life Safety Equipment and Systems, and is published under the date of November 2014.

CAN/ULC-S528-14 covers manual stations and their accessories for installation in ordinary locations, indoor and outdoor, for use in fire alarm systems. This standard also covers manual stations used for ancillary service, such as manual stations for the electrical release of extinguishing systems.

Changes from the previous Edition include:

- Enhanced requirements for components and installation wiring diagrams;
- Improved wording and new requirements for frames and enclosures;
- Simplified and removed unnecessary provisions;
- Deleted obsolete requirements for coded stations;
- Added a new, Component Stress Test;
- Enhanced and updated test requirements for Radio Frequency and Electromagnetic Radiations, Polymeric Materials, and Variable Ambient Temperature; and
- Revised Tables on Minimum Spacings and Rated Voltages.

This standard can be purchased for CAD\$ 264.00 (hardcopy) or CAD\$ 220.00 (PDF format) through our website at www.ulc.ca and by selecting the link to *ULC Standards*. Once on the ULC Standards homepage, select *Sales of ULC Standards Materials* for further details.

Should you require additional information, please contact Tess Espejo at (416) 288.2212 or by email at address: Theresa.Espejo@ul.com

Yours truly,
ULC Standards
