STANDARDS BULLETIN 2014-39

NEW EDITION

Second Edition of CAN/ULC-S801

STANDARD ON ELECTRIC UTILITY WORKPLACE ELECTRICAL SAFETY FOR GENERATION, TRANSMISSION, AND DISTRIBUTION

ULC Standards is pleased to announce the publication of the Second Edition of CAN/ULC-S801, Standard on Electric Utility Workplace Electrical Safety for Generation, Transmission, and Distribution. This Standard has been approved by the ULC Standards Committee on Electric Utility Workplace Electrical Safety and has been published under the date of December 2014.

This Standard applies to the construction, operation, maintenance and replacement of electric utility systems that are used to generate, transform, transmit, distribute or deliver electrical power or energy to consumer services or their equivalent. The purpose of this Standard is to provide safety performance requirements for electric utilities, workers and employers involved in work on or near electric generation, transmission and distribution systems.

The Second Edition includes:

- New and updated sections on risk assessment and electric arc hazard;
- Informative material on equipotential bonding and grounding, fall protection and use of PPE; and
- Modified content that better aligns with the IEC Live Working standards.

If you require any additional information, please contact Gillian Ottley at 613-755-2729 ext. 61472 or by email at Gillian.Ottley@ul.com.

This Standard can be ordered for \$ 220.00 CAN (Hardcopy) or \$182.00 CAN (PDF) through our website at www.ulc.ca by selecting *ULC Standards*. Once on the ULC Standards homepage, select *Sales of ULC Standards Materials*.

Yours truly,

ULC Standards
