CERTIFICATION BULLETIN 2015-06

ULC Field Certification

To: Members of the ULC Advisory Council
Members of CACES, IGAC, CCFM&FC, CACP and others interested
Technical Standards and Safety Authority (TSSA)

As a safety science company with more than a century of proven experience and expertise, UL is the premier resource for testing, inspection, certification, compliance and knowledge solutions worldwide. UL's portfolio of services aims to provide greater global market access to our customers and enable them to compete more effectively and efficiently in today's fast-paced business world.

Underwriters Laboratories of Canada Inc. (ULC) is pleased to announce the launch of a new service offering in the field of Product Certification. The Field Certification service (ISO/IEC 17067 – Scheme Type 1b) accredited by Standards Council of Canada (SCC) is intended as a one-time certification of product(s) for a specific number of units or batch production and is not meant to be a substitute to regular product certification.

This service may additionally be used where a UL certified product has been inadvertently shipped without the UL Mark or has been modified in the field and needs to be field certified and in situations requiring a one-off field fabrication/manufacture of Listed products due to site access or limitations.

In this service offering, the Product is tested to the applicable standard by UL technical personnel to determine compliance and products that conform to the requirements (including any additional jurisdictional requirements) are field certified and a series of serialized numbered labels are applied to the product by UL technical personnel.

Additional information on the service offering and accredited scope can be accessed via the links below:

- On www.ULC.ca via [Field Certification \(FC\) Service](#)
- [SCC Certification Body Accreditation Program \(CBAP\) – Scope of Accreditation](#)

This Certification Bulletin may be forwarded to others who may have an interest in this service offering.

Any questions concerning the above should be directed to Mr. Timothy Evans at 416-288-2343 or by e-mail at: Timothy.Evans@ul.com

Sincerely,

Underwriters Laboratories of Canada Inc.
