CERTIFICATION BULLETIN 2016-03

Second Edition – CAN/ULC-S559-13 – Equipment for Fire Signal Receiving Centers and Systems

REQUEST FOR COMMENTS - PROPOSED EXTENSION OF EFFECTIVE DATE

To: Subscribers to UL & ULC's Certification Service for Equipment for Fire Signal Receiving Centers and Systems, CAN/ULC-S559-13 and others interested

This Bulletin is in continuation to ULC Standards Bulletin 2012-20 issued on December 21, 2012. An Industry File Review (IFR) initiated on October 15, 2014 is presently in effect to determine compliance with CAN/ULC-S559-13, 2nd Edition. The Effective Date for the File Review is June 30, 2016. UL has received feedback from industry requesting additional time to meet the new requirements.

In response to concerns raised by some manufacturers, UL is proposing an extension of the effective date from June 30, 2016 to December 16, 2016, to allow for the time needed to transition production to the latest update of the Standard.

Request for Comments

Comments Due: (30 days from date of bulletin)

Please provide your comments on the proposed change of the Effective Date for the 2nd edition of CAN/ULC-S559-13. Written comments should be sent by e-mail to the attention of Dan Kaiser at Daniel.J.Kaiser@ul.com. Please include your full name and company address to ensure a reply. Please note that comments may be made public.

All comments should be sent to arrive by **(30 days from date of bulletin)**. Unless specifically requested to do so, UL will not acknowledge comments indicating concurrence with this proposal. UL will review the responses and issue a subsequent bulletin announcing the outcome.

Thank you in anticipation for your communication on this subject.

Sincerely,

Underwriters Laboratories of Canada Inc.
