

CERTIFICATION BULLETIN 2012-09

CAN/ULC-S661-10, 1ST Edition of the Standard for Overfill Protection Devices for Flammable and Combustible Liquid Storage Tanks

- **To:** Subscribers to ULC's Certification Service for Overfill Protection Devices in accordance with ULC/ORD-C58.15-1992 and Others Interested.
 - EGXYC Overfill Protection Devices

This Bulletin is a follow-up to ULC Standards Bulletin 2011-09, announcing the publication of the 1st Edition of the Standard for Overfill Protection Devices for Flammable and Combustible Liquid Storage Tanks, CAN/ULC-S661-10.

ULC Inc. & UL LLC's attempt to harmonize US and Canadian overfill protection device requirements have taken longer than anticipated and has resulted in a delay in the initiation of the Industry File Review for CAN/ULC-S661-10 Standard that was published over a year ago.

CAN/ULC-S661-10 Standard will be superseding the requirements in ULC/ORD-C58.15-1992 once the Industry File Review has been initiated and a follow-up Certification Bulletin will be issued advising of the adoption of CAN/ULC-S661-10 Standard and the effective date of compliance for all ULC Listees. In the interim, ULC will be accepting certification requests for compliance to the requirements of CAN/ULC-S661-10 Standard.

Any questions concerning the above should be directed to Mr. Gunsimar Paintal, Regional Quality Manager & ULC Mark Program Owner, +416.288.2217.

Sincerely,

Underwriters Laboratories of Canada Inc.
