CERTIFICATION BULLETIN 2012-11

Withdrawal of Certification Program for Storage Vaults – ULC/ORD-C142.6-00 CCME Ref # PN1326: Environmental Code of Practice for Aboveground and Underground Storage Tank Systems Containing Petroleum and Allied Petroleum Products

To: Members of the Advisory Council of Underwriters Laboratories of Canada Inc. (ULC),
Subscribers to ULC's Listing Service - EHMBC and Others Interested

The ULC service covers Certification of Storage Vaults in accordance with ULC/ORD-C142.6-00 (including Amendment 1).

Effective April 1, 2013 ULC will discontinue the Testing & Certification of Storage Vaults and will withdraw the ORD, this Certification Program and all current Listings. ULC for the present is not considering replacing this ORD.

ULC reviews its certification programs on an ongoing basis and the decision to exit was driven by business needs.

ULC/ORD-C142.6 is referenced in PN 1326 "Environmental Code of Practice for Aboveground and Underground Storage Tank Systems Containing Petroleum and Allied Petroleum Products (2003)". We have requested CCME to update their publication to reflect the withdrawal.

ULC Standards will continue to work with stakeholders to facilitate the development of consensus based standards. Should CCME be interested in proposing standards development in this area, a New Work Item Proposal would need to be submitted to the Director, Standards Department, ULC Standards.

Any questions concerning the above should be directed to Mr. Gunsimar Paintal at 416-288-2217 or by e-mail at: Gunsimar.Paintal@ul.com.

Sincerely,

Underwriters Laboratories of Canada Inc.	
	
Gunsimar Paintal Regional Quality Manager & ULC Mark Program Owner
