CERTIFICATION BULLETIN 2009- 34

To: Subscribers to ULC's Listing Service for Central and Monitoring Station Burglar Alarm System Units (AMCXC)

Subject: Request for Comments to Extend the Effective Date for Central Station and Police Station Connected Alarm Units

The Second Edition of the Standard for Signal Receiving and Centre and Premise Burglar Alarm Control Units, CAN/ULC-S304 dated July 2006 contains revised requirements that become effective on December 31, 2009.

Due to the concerns expressed by a significant representation of the manufacturing community for additional time to complete the testing of their products and to implement product documentation changes into their manufacturing process, ULC is proposing to extend the effective date until July 1, 2010.

REQUEST FOR COMMENTS

Please provide your comments on the proposed extension of the effective date. Written comments should be sent by regular mail, or e-mail to the attention of Daniel J. Kaiser (Daniel.J.Kaiser@us.ul.com) at UL's Northbrook Office. If you respond by e-mail, please include your full name, title, company address, email address and phone number to ensure a reply. Please note that comments may be made public.

All comments should be sent to arrive by December 31, 2009. Unless specifically requested to do so, ULC will not acknowledge comments indicating concurrence with this proposal.

Thank you in advance for your communication on this topic.
