## **STANDARDS BULLETIN 2013-25**

---

**Fifth Edition CAN/ULC-S537-13**

**STANDARD FOR VERIFICATION OF FIRE ALARM SYSTEMS**

---

ULC is pleased to announce the publication of the Fifth Edition of CAN/ULC-S537-13, Standard for Verification of Fire Alarm Systems. This National Standard of Canada has been approved by the ULC Committee on Fire Alarm and Life Safety Equipment and Systems, and has been published under the date of October 2013.

CAN/ULC-S537 prescribes inspection and test procedures for the purpose of verifying that the fire alarm system is installed in conformance with the design, and with CAN/ULC-S524, Standard for Installation of Fire Alarm Systems, and that it performs all of its intended functions. The Standard is intended to apply to both required and voluntary fire alarm installations.

CAN/ULC-S537 is currently referenced in the National Building Code of Canada. It is recommended that users obtain CAN/ULC-S537 together with its twin document CAN/ULC-S536-13, Standard for Inspection and Testing of Fire Alarm Systems. These standards can be purchased individually or as a set through our website at [www.ulc.ca](http://www.ulc.ca) and by selecting ULC Online Store.

Should you require any additional information, please contact Theresa (Tess) Espejo at [Theresa.Espejo@ul.com](mailto:Theresa.Espejo@ul.com) or at (416) 288-2212.

Yours truly,

G. Rae Dulmage  
Director, Standards Department, Government Relations  
Office and External Affairs
