## STANDARDS BULLETIN 2009-36

### First Edition CAN/ULC-62193-09

#### LIVE WORKING – TELESCOPIC STICKS AND TELESCOPIC MEASURING STICKS

ULC is pleased to announce the publication of the First Edition of CAN/ULC-62193-09, Live Working – Telescopic Sticks and Telescopic Measuring Sticks (CEI/IEC 62193:2003, MOD). This Standard has been approved by the ULC Committee on Live Working, and has been published under the date of November 2009.

This National Standard is an adoption, with Canadian deviations, of the International Electrotechnical Commission Standard CEI/IEC 62193:2003.

This National Standard covers telescopic sticks and telescopic measuring sticks to be used for live working on a.c. or d.c. electrical installations at 1 000 V and above for a.c. and 1 500 V and above for d.c.

The telescopic sticks are designed to accept attachments that meet appropriate live working standards and, together with these attachments, may be used to perform mechanical work on live parts at a distance. Telescopic sticks are also designed to accept diagnostic devices that meet appropriate live working standards and are used to make diagnostic devices reach parts of an installation to be tested. Telescopic measuring sticks, or telescopic sticks equipped with graduations, are used to measure distances to or between live parts.

Telescopic hood sticks are not covered by this Standard. Telescopic bonding sticks and any other specialty telescopic sticks designed at the request of users are not covered by this Standard.

If you require any additional information, please contact Keith Jansa at (613) 755-2729 ext. 6227 or at email address: [Keith.Jansa@ca.ul.com](mailto:Keith.Jansa@ca.ul.com)

This standard can be ordered for \$144.00 CAN (Hardcopy) from the ULC website at [www.ulc.ca](http://www.ulc.ca) by clicking on Order Standards and Directories followed by selecting ULC Online Store.

Yours truly,
