STANDARDS BULLETIN 2010-27

Second Edition of CAN/ULC-61243-1-10 (MOD)
**Standard on Live Working – Voltage Detectors - Part 1: Capacitive Type to be
Used for Voltages Exceeding 1 kV a.c.**

ULC Standards is pleased to announce the publication of the Second Edition of CAN/ULC 61243-1-10 Live Working – Voltage Detectors - Part 1: Capacitive Type to be Used for Voltages Exceeding 1 kV a.c., and has been published under the date of December 2010.

CAN/ULC-61243 standards are applicable to portable voltage detectors, with or without built-in power sources, to be used on electrical systems for voltages of 1 kV to 765 kV a.c., and frequencies of 50 Hz and/or 60 Hz.

CAN/ULC-61243-1-10 applies only to voltage detectors of capacitive type used in contact with the part to be tested, as a complete device including its insulating element or as a separate device, adaptable to an insulating stick which, as a separate tool, is not covered by this standard. For more information on insulating sticks, see CAN/ULC-60832 Live working – Insulating sticks and attachable devices, which is currently scheduled to be replaced by CAN/ULC-60832-1 Live working – Insulating sticks and attachable devices Part 1: Insulating Sticks.

More information about safe work methods and the use of Voltage Detectors can be found in CAN/ULC-S801 Standard on Electric Utility Workplace Electrical Safety for Generation, Transmission and Distribution.

CAN/ULC-61243-1-10 is a Canadian adoption with modifications of the Second Edition of IEC 61243-1:2009.

If you require any additional information, please contact Wouter van Halderen at 613-755-2729 or by email at: Wouter.vanHalderen@ca.ul.com.

This standard can be ordered for \$282.00 CAN (Hardcopy) from the ULC website (www.ulc.ca) ULC online store.

Yours truly,

ULC Standards
