STANDARDS BULLETIN 2013-30

First Edition of CAN/ULC-S676

STANDARD FOR THE REFURBISHING OF UNDERGROUND AND ABOVEGROUND TANKS FOR FLAMMABLE AND COMBUSTIBLE LIQUIDS

ULC Standards is pleased to announce the development of the First Edition of CAN/ULC-S676 Standard for the Refurbishing of Underground and Aboveground Tanks for Flammable and Combustible Liquids.

The requirements in this Standard provide the minimum performance criteria to establish an acceptable and secure method for the Refurbishing of Steel or Reinforced Plastic Underground and Aboveground tanks for Flammable and Combustible Liquids which have been disinterred and/or are intended for reuse or relocation.

This first edition of the Standard will replace the Technical Supplements for the Refurbishing of Underground and Aboveground Tanks for ULC-S601 (A)-2001, ULC-S603 (A)-2001, ULC-S615 (A)-2002 and ULC-S630(A)-2001.

As a standards development organization (SDO) recognized in Canada as having the competence to develop National Standards of Canada, ULC Standards is among the SDOs whose standards development work is eligible for funding from the Standards Council of Canada (SCC). SCC funding is specifically slotted for the review and update of various technical standards maintained by SCC-accredited SDOs that are referenced in Canadian federal regulations and which have been confirmed by government departments as being of ongoing significance to their regulatory mandates.

If you require any additional information, please contact Suzanne Anderson at 613-755-2729 ext. 61418 or by email at: Suzanne.anderson@ul.com

Yours truly,

ULC Standards
