STANDARDS BULLETIN 2016-13

NEW EDITION OF STANDARD

Third Edition of CAN/ULC-S133:2016

STANDARD METHOD OF TESTS FOR DOOR CLOSERS INTENDED FOR USE WITH SWINGING DOORS

ULC Standards is pleased to announce the publication of the Third Edition of CAN/ULC-S133:2016, Standard Method of Tests for Door Closers Intended for Use with Swinging Doors. This Standard has been approved by the ULC Standards Committee on Fire Tests and has been published under the date of February 2016.

In this new edition, the Scope was modified to clarify the exclusion of spring hinges. Updates were made to the existing Reference Publications and a mandatory marking section was added.

This Standard establishes requirements for door closers intended for use with swinging doors in fire separations and on exit doors. This Standard does not cover door closers equipped with hold-open features. This Standard does not cover spring hinges.

The door closers covered by this Standard are intended for installation in accordance with NFPA 80, Standard for Fire Doors and Other Opening Protectives. The door closers covered by this Standard are intended for installation on interior doors and for interior mounting on exterior doors. The applicability of data from this Standard to a product in actual use is dependent on test specimens being representative of that product.

This Standard will be of interest to those involved in research and development of building construction materials, fire protection experts, engineers and architects, as well as builders, manufacturers and regulatory officials.

If you require any additional information, please contact Kevin HF Wu at (613) 755-2729 ext. 61437 or by email at Kevin.HF.Wu@ul.com.

This Standard can be ordered for \$224.94 CAN (Hardcopy) or \$187.45 CAN (PDF) from the ULC Standards website at www.ulc.ca and select *ULC Standards*. Once on the ULC Standards homepage, select *Sales of ULC Standards Materials* for further details.

Yours truly,

ULC Standards
