## Fourth Edition CAN/ULC-S651:2016-REV1

### STANDARD FOR EMERGENCY VALVES FOR FLAMMABLE AND COMBUSTIBLE LIQUIDS

---

ULC Standards is pleased to announce the publication of Revision 1 to the Fourth Edition of CAN/ULC-S651, Standard for Emergency Valves for Flammable and Combustible Liquids. It was approved by the ULC Committee on Fueling Accessories for Flammable and Combustible Liquids, and is published under the date of January 2018.

This Standard provides minimum requirements for emergency valves that are intended to be used for the control of flammable and combustible liquids which are handled at temperatures within the range of -40°C to +50°C. The valves are of the type used in motor fuel dispensing equipment and associated piping systems. Valves covered under these requirements are newly produced valves constructed entirely of new unused parts and materials. These requirements cover valves of the mechanically or temperature operated types or combinations of such to the exclusion of types operated wholly or partially by electricity. They may form a part of an assembly, which provides for additional functions of service, the requirements of which are outside the scope of this Standard.

The following revisions have been incorporated into this edition of the Standard:

- Revised Glossary Clause 3.2; and
- Added an Exception to Clause 4.7.2.

This Standard can be ordered for CAD \$234.00 (hardcopy) or CAD \$195.00 (PDF format) through our website at [www.ulc.ca](http://www.ulc.ca) and by selecting the link to *ULC Standards*. Once on the ULC Standards homepage, select *Sales of ULC Standards Materials* for further details.

Should you require additional information, please contact Caitlin D'Onofrio at (613) 755.2729 ext. 61430 or by email at [Caitlin.DOnofrio@ul.com](mailto:Caitlin.DOnofrio@ul.com)

Yours truly,
