STANDARDS BULLETIN 2018-07

NEW EDITION OF STANDARD

Fourth Edition of CAN/ULC-S114:2018

STANDARD METHOD OF TEST FOR DETERMINATION OF NON-COMBUSTIBILITY IN BUILDING MATERIALS

ULC Standards is pleased to announce the publication of the Fourth Edition of CAN/ULC-S114:2018, Standard Method of Test for Determination of Non-Combustibility in Building Materials. This Standard has been approved by the ULC Standards Committee on Fire Tests and has been published under the date of June 2018.

This new edition includes an update to the Referenced Standards and moved this section within the normative body of the standard and additional requirements to provide clarity under the Interpretation of Results section regarding the determination of non-combustible material in relation to loss of mass under test conditions.

This Standard provides a means of determining the non-combustible nature of elementary building materials. It shall be applied to materials used in the construction of buildings. It does not apply to materials with a decorative or protective coating, or impregnation, or built up of laminations of dissimilar materials. (Adhesives between laminations shall be considered laminations.)

For any additional information, please contact Mary Huras at 613 755-2729 ext. 61425 or by email at Mary.Huras@ul.com.

This Standard can be ordered for \$200.00 CAD (Hardcopy) or \$150.00 CAD (PDF) from the ULC Standards website at <http://canada.ul.com/ulcstandards/>. Click on *Sales of ULC Standards Materials* for more information.

Yours truly,

ULC Standards

Mary Huras
