STANDARDS BULLETIN 2019-10

REVISION OF STANDARD

Revision of Second Edition CAN/ULC-S656-14 STANDARD FOR OIL-WATER SEPARATORS

ULC Standards is pleased to announce the publication of a Revision to the Second Edition of CAN/ULC-S656, Standard for Oil-Water Separators. This Standard has been approved by the ULC Technical Committee on Oil Water Separators, and have been published under the date of March 2019.

This Standard provides minimum requirements for shop fabricated single-wall or double-wall oil-water separators intended to collect and separate free oil from water by gravity separation at an inlet free oil concentration not exceeding 2 000 mg/L.

In addition to this Standard's performance requirements for oil water separators that primarily evaluate the separator's effectiveness and mitigate environmental hazards from loss of liquid containment under expected normal conditions; optional construction and/or performance requirements, and associated ratings intended to address more severe conditions associated with the effects of Climate Change are included in Appendix B.

The following revisions have been incorporated into this edition of the Standard:

- Scope modifications to address Optional Climate Change Adaptation Requirements;
- Added Appendix B (Informative) - Optional Climate Change Adaptation Requirements; and
- Editorial corrections.

This Standard can be ordered for CAD \$270.00 (hardcopy) or CAD \$225.00 (PDF format) through our website at www.ulc.ca and by selecting the link to *ULC Standards*. Once on the ULC Standards homepage, select *Sales of ULC Standards Materials* for further details.

Should you require additional information, please contact Caitlin D'Onofrio at (613) 755.2729 ext. 61430 or by email at Caitlin.DOnofrio@ul.com

Yours truly,

ULC Standards
