STANDARDS BULLETIN 2019-12

Revision of Third Edition ANSI/CAN/UL/ULC 1316:2018

STANDARD FOR FIBRE REINFORCED UNDERGROUND TANKS FOR FLAMMABLE AND COMBUSTIBLE LIQUIDS

ULC Standards is pleased to announce the publication of a Revision to the Third Edition Joint National Standard of Canada (NSC) and American National Standard (ANSI), ANSI/CAN/UL/ULC 1316:2018, Standard for Fibre Reinforced Underground Tanks for Flammable and Combustible Liquids. This Joint ANSI and NSC have been approved by the Joint UL/ULC Technical Committee on Flammable and Combustible Liquid Underground Tanks, and have been published under the date of March 12, 2019.

This Standard sets forth minimum design and construction requirements for fibre reinforced plastic, non-pressure tanks that are used for the underground storage of flammable and combustible liquids.

In addition to this Standard's traditional safety requirements for underground fiber reinforced plastic tanks that primarily evaluate structural integrity, material compatibility and mitigate environmental hazards from loss of liquid containment under expected normal conditions; optional construction and/or performance requirements, and associated ratings, intended to address more severe conditions associated with the effects of Climate Change are included in Appendix F.

The following revisions have been incorporated into this edition of the Standard:

- Scope modifications to address Optional Climate Change Adaptation Requirements;
- Added Appendix F (Informative) - Optional Climate Change Adaptation Requirements; and
- Editorial corrections.

This Standard can be ordered for CAD \$668.71 (hardcopy) or CAD \$535.50 (PDF format) through our website at www.ulc.ca and by selecting the link to *ULC Standards*. Once on the ULC Standards homepage, select *Sales of ULC Standards Materials* for further details.

Should you require additional information, please contact Caitlin D'Onofrio at (613) 755.2729 ext. 61430 or by email at Caitlin.DOnofrio@ul.com

Yours truly,

ULC Standards
