## INFORMATION BULLETIN 2024-01

---

### **ULC TS-2723:2024, ECOLOGO® Certification Program for Responsible Development for the Mineral Exploration Industry**

---

**TO: Members of the Advisory Council of Underwriters Laboratories of Canada**

Subscribers to ECOLOGO® Certification Program for mineral exploration, UL 2723 and UL 2724 Others Interested

---

UL Solutions in Canada is pleased to announce the publication of the First Edition National Technical Specification ULC TS 2723:2024, ECOLOGO® Certification Program for Responsible Development for the Mineral Exploration Industry.

This document consolidates the requirements in UL 2723, ECOLOGO® Certification Program for Responsible Development for Mineral Exploration Companies, and UL 2724, ECOLOGO® Certification Program for Responsible Development for Suppliers of the Mineral Exploration Industry, both of which are now deemed superseded.

ULC TS 2723 outlines responsible development requirements for the mineral exploration industry. Certification of companies is contingent on verification of compliance with requirements of the program by an independent auditor. UL ECOLOGO® is the administrator of this certification program. This program applies to companies that conduct mineral exploration activities and wish to be recognized for their application of responsible development practices.

UL Solutions in Canada administers the development and publication of Technical Guides (TG), Technical Reports (TR) and Technical Specifications (TS), collectively known as ULC Technical Documents, in accordance with the Canadian Standards Development – National Technical Specifications Process of Standard Council of Canada (2019). ULC Technical Documents cover an array of document types developed to address rapidly changing environments in technology, business or regulation, where speed of delivery rather than full consensus is of paramount importance.
